

Sounding Board - (free APP)

SoundingBoard allows you to easily create unlimited choice boards with up to 20 message locations using AbleNet symbols or your own photos from your camera roll.

How it's Organized:

- Virtually unlimited capacity; create boards for any situation
- Record messages of virtually any length for each symbol
- Not able to be used on android devices

Create a New Board:

- To create a new board, upper right hand corner it says **+ add board**
- Label the board e.g: Clothes
- Select an image that you'd like from the library or your camera
- Record message
- Click on the right arrow at the top right hand side to add buttons
- Add an image. An image can be resized once it's chosen
- Once the image has been selected add a message name (text), then record a message to play when the item has been pushed
- Add more buttons by using the white arrow at the top right of the screen
- **Save** the board by clicking the right arrow instead of the add image button. The board will now be saved under "User Created Boards" on the directory .

- To make changes, add more choices etc. press **Edit boards** at the top left of the directory and you will be able to change previously made boards.
- Pictures can also be moved around on the page by holding down the picture and dragging it to the location you would like it moved to.
